

Kritika Sharma

Product Designer | Product & Business Analyst

✉ kritikaks0925@gmail.com 📞 +91-9315746650 📍 Delhi, India

Professional Summary

Product-focused professional with experience across SaaS products and national-scale government digital initiatives. Skilled in requirement gathering, FRDs, stakeholder coordination, sprint support, workflow optimization, and cross-functional collaboration. Worked closely with product, design, engineering, and client teams to translate business requirements into scalable and delivery-ready product experiences.

Professional Experience

03/2024 – Present
Delhi, India

Avalon Information Systems Pvt. Ltd.

Product Designer | Product & Business Analyst

- Owned end-to-end requirement gathering cycles across government and SaaS initiatives including discovery, documentation, reviews, stakeholder alignment, and change handling.
- Authored 30+ FRDs covering workflows, validations, business rules, exports, dashboards, analytics requirements, and edge cases.
- Converted requirements into user stories and acceptance criteria while supporting backlog grooming and sprint coordination in Jira.
- Supported 20+ sprint cycles across planning, execution, UAT, and release readiness phases.
- Coordinated across 15-20 member cross-functional teams including engineering, QA, design, leadership, and stakeholders.
- Collaborated directly with CTO-level leadership and government stakeholders on delivery planning, workflow improvements, and implementation discussions.
- Managed 3+ parallel initiatives simultaneously while ensuring alignment between business requirements and technical feasibility.
- Received formal appreciation from HR and PARAKH (NCERT) leadership for proactive ownership and delivery quality.

Education

2020 – 2024
Delhi, India

B.Tech – Computer Science Engineering
GGSIPU (ADGITM)

Core Skills

Product & Business

- Requirement Gathering
- FRDs & Functional Specs
- User Stories & Acceptance Criteria
- Sprint Support & UAT
- Stakeholder Management
- Process Mapping

UX & Design

- User Flows
- Wireframing
- Heuristic Evaluation
- Design Systems
- Workflow Optimization

Tools

- Jira
- Confluence
- Figma
- Notion
- Miro
- Excel

Certifications

- Google Project Management Professional Certificate – Coursera
- Google UX Design Professional Certificate – Coursera
- AI Masterclass – The Economic Times

Career Progression at Avalon

UX/UI Intern -> Product Designer -> Product & Business Analyst

Expanded responsibilities from design execution into requirement gathering, stakeholder discussions, sprint coordination, FRDs, and UAT support across multiple product initiatives.

Key Product Deliveries

NCERT PARAKH – Holistic Progress Card (HPC) System

- Contributed to the digitization of a 7-role academic evaluation platform used by teachers, schools, and district/state authorities.
- Helped replace manual reporting workflows and contributed to improving reporting efficiency across academic cycles.
- Authored FRDs, workflows, and user stories supporting role-based access, dashboards, exports, and analytics modules.
- Conducted UAT sessions, captured stakeholder feedback, clarified requirements, and supported release readiness.
- Conducted bilingual enablement sessions and trained 1,000+ stakeholders across district and state levels.

PARAKH Web Portal – parakh.gov.in

- Managed end-to-end coordination from requirement gathering to design handoff across 60+ screens/pages.
- Collaborated directly with company leadership and client stakeholders to manage iterative feedback and evolving requirements.
- Structured workflows, navigation systems, and information architecture aligned with stakeholder expectations.

DFA (Data For All) – SaaS Suite

- Conducted usability and workflow audits across 10+ modules and identified friction points across 40+ screens.
- Improved workflow consistency and reduced operational friction through collaborative design and engineering discussions.
- Supported prioritization of fixes and enhancements during sprint planning cycles.

UNICEF – NIS.Cost

- Supported a 12+ month engagement involving weekly client discussions, evolving requirements, documentation tracking, and stakeholder reviews.
- Collaborated with cross-functional teams to convert discussions into actionable workflows, iterations, and delivery support.
